Cleaning Instructions

Windows

The windows fitted are fully reversible tilt and turn windows.

- For cleaning glass the opening sashes fully reverse (or swing inward in the case of sash and case type) and lock in position to enable cleaning from inside.
- To clean wooden frames use diluted liquid detergent applied with a soft sponge or cloth.
- Do not use thinners, acetone or abrasive cleaners.

Sanitary Ware

Do not use

- Acid
- Any form of abrasive cleaning materials
- Caustics

Kitchens

Axiom decorated laminates are tested to a temperature of 180 degrees centigrade. Boiling water and cooking splashes will therefore do no damage to the surface of the worktop.

To prevent damage from hot objects, use heat resistant mats on the surfaces of the worktop. Never place objects taken from the oven or hob directly onto the laminate surface since this may lead to blistering. Always use ashtrays for cigarettes. Care should always be taken with hot irons and cigarettes.

Always use a chopping board for preparing food. Do not cut directly on the worktop.

Wipe spilt liquids away from joints and cut-outs immediately. Liquids should not be allowed to collect around joints and cut-outs.

General cleaning of the worktops and kitchen units requires only a damp cloth and a mild detergent or non-abrasive cleaner diluted in warm water. Abrasive scouring powders, creams and polishes should all be avoided. If the worktop has a textured surface, a soft nylon nailbrush can be used to ensure a more thorough cleaning. Potential stains should be removed immediately.
